CAREER OBJECTIVE

I'm an AI student with a deep interest in web development, machine learning, and data science. I love creating responsive web apps and exploring smart technologies that can solve real-world problems. I'm especially interested in combining software development with AI to build useful, data-driven solutions that make a real impact.

EDUCATION

2023-2027	B-TECH Artificial Intelligence And Data Science Kongu Engineering College, Erode	8.54* (sem 5)
2021-2023	HSC - Sowdabikaa Matric Higher Secondary School, Thottiyam, Trichy	92%
2020-2021	SSLC - Mount Giris Matric Higher Secondary School, Ayyarmali, Karur	

PROJECTS

Coastal safeguard	Automated disaster alert dashboard with live weather, maps, and email notifications. Tech Stack: React, Node.js, OpenWeatherMap
Air Quality Prediction	An ML-powered solution to forecast AQI based on pollutant data like PM2.5 and PM10. Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Colab
Deep Fake	Smart detection of deepfakes using advanced neural networks and classification models. Tech Stack: Python, TensorFlow/Keras, NumPy, CNN/RNN models
Photographer Portfolio Website	A responsive portfolio platform to showcase photography work with categorized galleries, high resolution image previews, and viewing experience. Tech Stack: HTML, CSS, TypeScript, React, Node.js, supabase

SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Web Development:** HTML, CSS, React, MongoDB, SQL
- **Tools and Framework:** PowerBi, TensorFlow, Pandas, Numpy
- **Soft Skills:** Teamwork, Leadership, Problem Solving

AREAS OF INTEREST

- Data Analysis
- DBMS
- Machine Learning
